Receipt Printer SP512 Manual Install

Hook up your printer to your computer using the instructions on page 7 of the receipt printer manual

Load paper, and turn the power on

Using your internet browser, go to <http://www.tds.lib.mn.us/Staff/Support.htm>

Click on software and hardware support.

Under Sirsi, click on download receipt printer driver.

Click save.

Choose desktop.

Click save again.

A tdsprinter icon shows on your desktop. Double click on it.

Choose run. "Welcome to the Star Printer Driver Installer". Click ok.

Choose "Extract files for installation via Windows add printer Wizard".

"This driver set includes a printer status monitor" – say no.

A folder should appear on your desktop. Click ok. Choose exit.

Click on the "Start" button and go to "printers and faxes".

Click add printer. "Welcome" screen comes up. Click next.

"Local or network printer" choose local printer attached to this computer. Click next.

"Select a printer port" – use the following port LPT1. Click next.

"Install a printer software" – click "Have Disk". "Install from disk" – click "Browse".

Locate file – "My Documents" is always the default.

Click the down arrow to find "Desktop".

Click open.

“Star” folder should appear.

Highlight and click open again.

“Star LM” appears.

Highlight and click open again.

“OEMPrint” shows on screen. Highlight and click open again.

You are back to the “install from disk” screen but now it has a c:\ file name in the box. Click ok.

Scroll down the list to find the “SP512 Line Mode Printer” and highlight.

Click next.

Printer name should be showing in the box

NO you don't want to use this as the default.

Click next.

Print test page? YES!

Click next.

“Completing the Add Printer Wizard”.

Click finish.

Hardware installation warning comes up. Ignore. Click “continue anyway”.

The computer starts copying files. This will take a few minutes. When it is done, a test page should print.

Close out of all the screens you have open.
